

#### 4. Imaginaerial

A bizarre mash-up of contemporary circus and a wellbeing manual, Imaginaerial is one of, if not the most creative genre mash-up featured in this year's Fringe line-up. The show uses the unusual medium of aerial acrobatics to stage a refreshing take on the way our minds work in a stress-inducing society, confronting a difficult topic with the raw emotion and joy of aerial acrobatics. Imaginaerial is brought to life by a dedicated team of locals, making this Fringe World performance a world premiere not to be missed!

### Imaginaerial

Source: Kaleido Company

If you thought you weren't that interested in science, the contemporary circus performance, 'Imaginaerial', will prove you wrong. Sitting at the intersection between science and art, Kaleido Company's new show 'Imaginaerial' explores the idea of neuroplasticity through jaw-dropping aerials, acrobatics, and a whole lot of satire. Expect to see perfectly finessed lyra, straps and acrobatic routines. It's circus like you've never seen it before.

Tickets are \$25.00 and can be purchased [here](#).
